ALEKS is a personalized, adaptive learning experience that supports students at all levels of preparation. Flexible enough to support a variety of course formats, ALEKS integrates assessment and learning to provide a truly optimal experience where students work on material they need, right when they need it.

[Discrete Mathematics -- from Wolfram MathWorld](#)

In mathematics, and more specifically in graph theory, a graph is a structure amounting to a set of objects in which some pairs of the objects are in some sense

"related". The objects correspond to mathematical abstractions called vertices (also called nodes or points) and each of the related pairs of vertices is called an edge (also called link or line).
